

# ***Student Access Database***

## **Objective I:**

Create a user friendly data base that shows evidence of proper data fields, record creation and use of primary key.

## **Objective II:**

Use the form wizard to create a better data entry experience for the end user.

Watch the instructional [video](#) for assistance with this project.

## **Scoring Rubric:**

Database complete with 10 fields		10
Variety of different input fields (not all text format) yes/no checkbox and pull down menu are required		10
Includes table and form for data entry (use form wizard)		10
Quality questions (thought and effort was put into the development)		5
Proper headings / field names		5
Database contains at least 20 records		10
	Total	50
